DETAILED ACTION

Response to election

The examiner is in receipt of applicant's response to office action mailed 8/31/2005 which was received 10/11/2005. Acknowledgment is made to the election of Group IIA including claims 10,19,20 and 21.

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3625

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10,19,20 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Ritz (2003/0109944).

In regards to claim 10, Ritz discloses an apparatus for allowing a consumer to digitally mark portions of media content and later retrieve the marked portions uniquely keyed to that consumer (abstract), comprising:

- a. storage for storing the media content (FIG 1);
- b. a server computer accessing the media content storage (FIG 1);
- c. a workstation interacting with the server computer to allow the consumer to sample portions of the stored media content (FIG 1);
- d. a plurality of portable identification means, separate from the server and the workstation, and including identifying indicia unique to each instance of the portable identification means (page 1, para 0015); and
- e. an array containing references to the identifying indicia and indicia keyed to selected instances of the sampled portions of the stored media content (FIG 4 and 5).

In regards to claim 11, Ritz teaches wherein the array further comprises indicia of the consumer's identity (FIG 2).

Art Unit: 3625

In regards to claims 20 and 21, these are considered parallel claims to claims 10 and 19 above and are rejected for the same reasons.
